

Amendments to the Specification:

Please amend the paragraph starting at page 1, line 20, as follows:

A technique disclosed in, for example, JP ~~11-23012~~ 11-230012 A drives the auxiliary machinery by a motor when the internal combustion engine stops.

Please amend the paragraph starting at page 1, line 23, as follows:

The technique disclosed in JP ~~11-23012~~ A 11-230012 A drives the motor for rotation in the normal direction to start the internal combustion engine and disconnects the motor from the auxiliary machinery to intercept torque transmission from the motor to the auxiliary machinery when the internal combustion engine is at a standstill, and drives the motor for rotation in the reverse direction to drive the auxiliary machinery and disconnects the motor from the internal combustion engine to intercept torque transmission from the motor to the internal combustion engine when the internal combustion engine is at a standstill.
